WHO IS SOLERA?

Solera Dealer Solutions is the retail automotive industry's only true end-to-end ecosystem—where every best-in-class tool works seamlessly towards one goal: making it easier for dealers (and their customers) to thrive. No need to juggle vendors, or settle for 'good enough' solutions.

From sales to service, payments to marketing, and beyond, we unify your entire dealership under one powerful, intelligent platform. You can focus on what really matters: selling more cars, going above and beyond for your customers, and growing your business—without having to hack through a tech-vendor jungle.

The global Solera entity is a leading provider of integrated vehicle lifecycle and fleet management software-as-a-service, data, and services.

Through four lines of business

- vehicle claims, vehicle repairs, dealer solutions and fleet solutions
- Solera is home to many leading brands in the vehicle lifecycle ecosystem, including Identifix, Audatex, DealerSocket, Omnitracs, eDriving/Mentor, Explore, cap hpi, Autodata, and others. Solera serves over 300,000 global customers and partners in over 100 countries.

online game.

The image displays the DealerFire website and its mobile application. The website header reads 'CUSTOMER ACQUISITION' with 'DealerSocket' and 'DealerFire' logos. A 'WELCOME' banner features a silver sedan. The main page includes a search bar, vehicle filters for 'Cars' (64 in stock) and 'SUVs' (28 in stock), and a 'BROWSE BY VEHICLE TYPE' section with categories like 'All Vehicles', 'Cars', 'SUVs', 'Hybrids', and 'Electric'. The mobile app shows a similar layout with vehicle images, filters, and a 'BROWSE BY VEHICLE TYPE' section with categories like 'SUVs & Crossovers' (28 in stock) and 'Hybrid & Electric' (3 in stock). The overall design is clean and modern, emphasizing mobile responsiveness.

CALL SERVICES

Our call center services offer a tailored approach to phone calls for your dealership, ensuring your company has consistent branding and messaging across all customer touchpoints. Solera offers multiple call center locations including U.S. based, specializing in appointment scheduling and lead management based on your business workflows. We can help with inbound or outbound calls, answering calls when you can't, engaging customers and booking appointments within your scheduler. We're available 24/7, 365 days a year—with AI calling, we always answer on the first ring.

EQUITY MINING

Equity Mining leverages advanced algorithms to analyze dealership databases, identifying sales and service opportunities such as customers nearing lease-end, those with positive equity, or declined services. The system integrates seamlessly with our CRM system, enabling targeted campaigns and customer engagement strategies. With sophisticated scoring algorithms, dealerships can prioritize leads and reduce marketing waste. Dedicated consultants provide expert insights, enabling dealerships to turn data into actionable revenue opportunities. Equity Mining fosters a relationship-driven approach, increasing customer satisfaction, retention, and gross profit while positioning dealerships as proactive and customer-centric businesses. It's a tool designed to unlock database potential and maximize revenue.

STOLEN VEHICLE RECOVERY

LoJack® offers dealers an innovative inventory management system, enabling efficient tracking and management of vehicle fleets, enhancing operational efficiency, and improving customer satisfaction. This system not only streamlines inventory processes but also adds a layer of security, protecting valuable assets from theft or misuse. With LoJack for Law Enforcement, LoJack is the only system integrated directly with law enforcement.

◀ LoJack

how LoJack can help
drive profitability.

LOT MANAGEMENT

Lot Management uses real-time technology to streamline vehicle tracking and inventory optimization. With instant location pinpointing, battery status monitoring, and loaner mileage tracking, dealerships can streamline operations while enhancing customer experiences. By reducing vehicle purchase time by 30 minutes and improving inventory audits by up to 300%, Lot Management maximizes efficiency and profitability. The solution integrates seamlessly into dealership workflows, offering actionable insights into aged inventory and trade-up opportunities. This ensures assets are managed effectively while creating a smoother, more customer-focused purchasing journey.

TITLING

Simplify the otherwise cumbersome titling process to foster efficient workflows. Use prepopulated forms and seamless communication with government entities to eliminate the hassle of manual paperwork. Our titling solution automates tax and fee calculations for every vehicle, boosting accuracy and ensuring customers can get on the road quickly.

Real-time title, registration fee, and tax calculations

Eliminates refund checks, DMV lines and manual processes

Standardizes your F&I process

SUSTAINABILITY

Sustainability initiatives like Sustainable Estimatics help dealerships and repairers reduce their environmental impact. The solution tracks CO₂ emissions with new metrics and scorecards, providing insights into emissions by manufacturer, paint, and other components. These tools align operations with regulatory requirements and consumer demand for eco-friendly practices. Anonymized data ensures security while delivering actionable insights through features like the timeline table. By integrating sustainability into day-to-day operations, businesses appeal to eco-conscious consumers, reduce costs, and strengthen their commitment to the environment. This positions them as leaders in green automotive solutions, bolstering reputation and customer trust.

DEALER OPERATIONS

INVENTORY MANAGEMENT

INVENTORY MANAGEMENT

Inventory+ provides appraisal tools that harness the power of real transactional data combined with current market listings to help you acquire vehicles that will drive your profits higher. Inventory+ provides best-in-class inventory management tools that make it easy to keep your inventory priced effectively—as well as market and syndicate—all inside one customizable tool. By combining our powerful transactional data with industry information and insights, Inventory+ gives you a competitive advantage for sourcing, acquiring, pricing, and marketing your vehicles.

VEHICLE ACQUISITION

Vehicle Acquisition tools integrate seamlessly into inventory management platforms, enabling dealerships to source, appraise, and stock high-value vehicles efficiently. By leveraging predictive analytics, build data integration, and missed appraisal tracking, dealerships can align inventory with market demands and maximize profitability. Group trade functionalities allow easy redistribution of inventory across dealer networks. By automating error-prone processes and centralizing data, this solution ensures profitability at every stage of vehicle acquisition while enhancing operational efficiency.

Vehicle Acquisition

INVENTORY MANAGEMENT

INVENTORY MANAGEMENT

INVENTORY PRICING

Inventory Pricing delivers real-time, market-driven pricing insights to optimize inventory profitability. With advanced market data and transactional insights, dealerships can set competitive prices based on actual market conditions, historical sales, and custom rules. Automatic repricing ensures inventory stays competitive, with adjustments for vehicle age and market trends. Bulk pricing capabilities reduce operational effort while maintaining consistency. This tool helps dealerships balance fast turnover and high margins, ensuring they remain agile in a fluctuating market while maximizing profitability.

Inventory Pricing

Talk to us about your vehicle acquisition needs.

APPRaisALS

Appraisal tools use centralized platforms to streamline and enhance the appraisal process. By combining historical transaction data and real-time market insights, dealerships can generate accurate vehicle valuations that balance competitive offers with profitability. This tool reduces overpayment risks and increases customer trust. Configurable screens and seamless data flow make appraisals faster and more efficient. By providing actionable insights and eliminating manual errors, these tools help dealerships secure better trade-ins, improving customer relationships and boosting dealership margins.

◀ Appraisals

INVENTORY MANAGEMENT

INVENTORY OPTIMIZATION

Inventory Optimization tools enable dealerships to craft a tailored inventory strategy using advanced analytics. By analyzing sales history, market trends, and auction data, these tools provide recommendations on what to stock and sell. The focus on profitability without compromising turnover ensures dealerships balance operational goals and market demands. This transformation of inventory management into a strategic advantage helps dealerships maximize returns and meet customer needs effectively.

Inventory+

Talk to us about how we can help you optimize your inventory.

VEHICLE MERCHANDISING

Vehicle Merchandising tools automate syndication across platforms, ensuring maximum visibility for inventory. Features like automatic SEO-rich description creation simplify discoverability and drive quality leads. Inventory health reports ensure that photos, pricing, and descriptions are updated to maintain a competitive edge. These solutions reduce time-to-market, attract buyers, and boost profitability, offering a comprehensive solution for effective vehicle marketing.

INVENTORY MANAGEMENT

SERVICE SUITE

Introducing the Service Suite—ensuring a consistent, seamless experience from purchase to service. Streamline your operations into one platform for all touchpoints, consolidating workflows, communication, and reporting. It's an end-to-end service experience built for the modern consumer, branded consistently for your dealership to ensure a smooth UX for you and your customers. The modular system allows you to choose and customize the setup that works best for your business.

◀ Service Suite

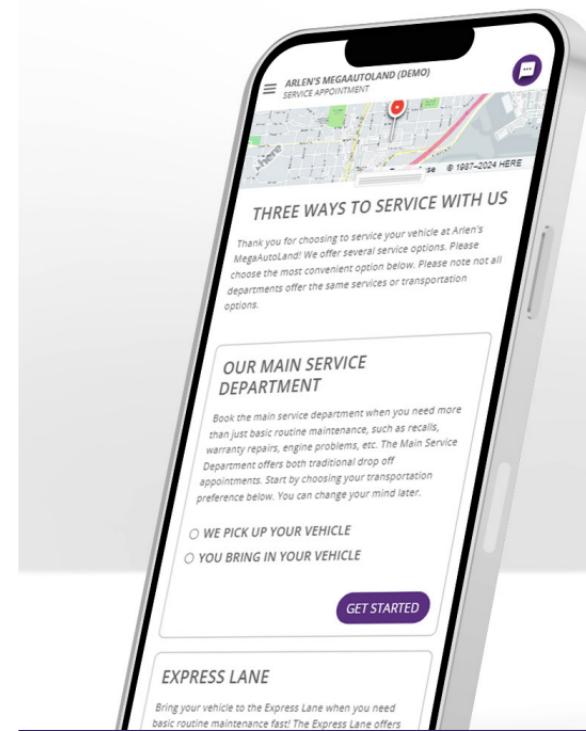

Talk to us about how we can help optimize your fixed operations.

Service Scheduling offers a seamless booking experience that integrates options like vehicle pickup, delivery, and shuttle services. With features like integrated text messaging, automated maintenance reminders, and capacity management, dealerships can increase appointment volumes while reducing no-shows to under 1%. Customers enjoy greater convenience, while dealerships benefit from higher repair order values and improved operational efficiency. These tools align with modern consumer expectations, enhancing customer satisfaction and service department profitability.

► Service Suite

CHECK-IN

The Check-In process simplifies vehicle intake with pre-populated service recommendations, digital vehicle condition capture, and instant advisor notifications. Integrated with service platforms, it allows customers to authorize services remotely or on-site, improving transparency and efficiency. Upselling opportunities are enhanced through automated recommendations, while photo and video documentation builds trust. Check-In eliminates bottlenecks, enhances workflow, and provides a positive first touchpoint in the service journey.

Service Suite

Talk to us about how we can streamline your check-in experience.

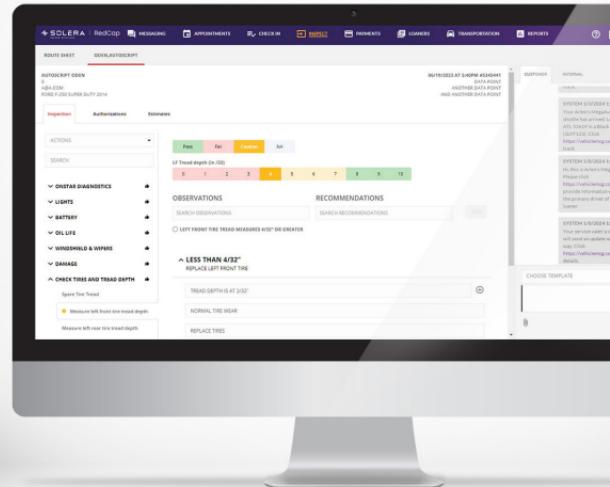

SERVICE INSPECTION

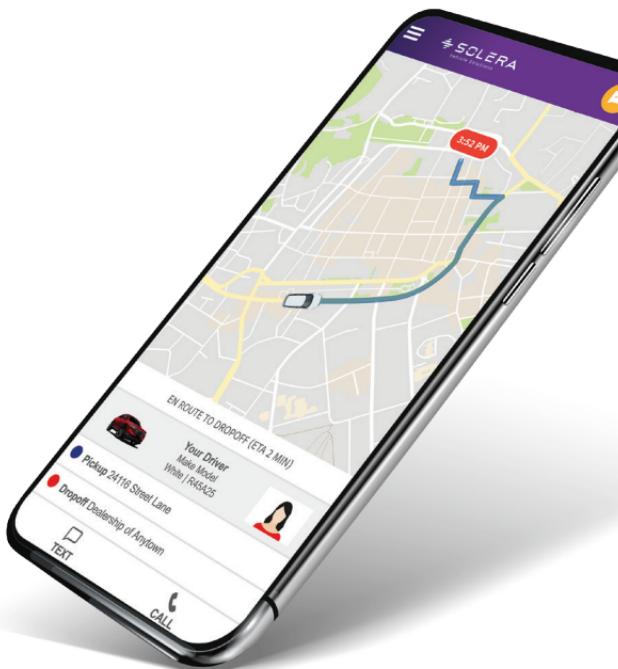

Service Inspection tools simplify the vehicle inspection process with customizable forms, comprehensive route sheets, and multimedia documentation. By enabling real-time updates, digital approvals, and tracking of declined services, these tools ensure no revenue opportunity is lost. Technicians can focus on delivering quality, while customers benefit from clear recommendations and a transparent service process. This solution boosts repair order value and customer satisfaction, turning inspections into an effective service touchpoint.

◀ Service Suite

Talk to us about how to optimize your inspections.

SHUTTLE SOLUTIONS

Shuttle Solutions replace traditional shuttle services with modern, on-demand options that integrate seamlessly with existing dealership systems. Customers can track rides in real-time and enjoy enhanced convenience, while dealerships benefit from increased out-of-store spending and a pay-as-you-go pricing model. These solutions deliver a competitive edge and a better customer experience, ensuring that modern transportation expectations are met.
